

Informed Consent for Telemental Health Services

Telemental Health is the delivery of psychotherapeutic services using interactive audio and visual electronic systems and/or by the electronic transmission of information where the provider and the patient are not in the same physical location.

The interactive electronic systems incorporate network and software security protocols to protect patient information and safeguard the data exchanged.

Potential benefits

- A computer and a webcam can provide live video conferencing using software that can be free to patients.
- Telemental health provides convenience and increased accessibility to mental health care for patients who are unable to be treated face to face due to various reasons such as living in remote locations, temporary circumstances such as being away at college, an extended stay away from home, or having a physical limitation preventing travel to our office.

Potential Risks

As with any mental health procedure, there may be potential risks associated with the use of telemental health. These risks include, but may not be limited to:

- Information transmitted electronically may not be sufficient (e.g., poor resolution of video) to allow for appropriate decision making by the psychiatrist or therapist.
- The provider is not able to provide every type of mental health treatment using interactive electronic equipment.
- The provider may not be able to provide for or arrange for emergency care that I may require, in cases of connection failure.
- Delays in mental health evaluation and treatment may occur due to deficiencies or failures of the equipment.
- Although unlikely, security protocols can fail, causing a breach of privacy of my confidential medical information.
- A lack of access to all the information that might be available in a face-to-face visit but not in a telemental health session may result in errors in clinical judgment.

Alternatives to the use of telemental health

- Face-to-face session in the mental health provider's office.
- Referral to another mental health provider.

My Rights

- I understand that the laws that protect the privacy and confidentiality of medical information also apply to telemental health.
- I understand that the videoconferencing technology used by the provider is encrypted to prevent unauthorized access to my private medical information.
- I have the right to withhold or withdraw my consent to the use of telemental health during the course of my care at any time. I understand that my withdrawal of consent will not affect any future care or treatment.
- I understand that the provider has the right to withhold or withdraw his or her consent for the use of telemental health during the course of my care at any time.
- I understand that the all rules and regulations that apply to the practice of medicine in the state of Illinois also apply to telemental health, since the provider is located in Illinois.
- I understand that the provider will not record any of our telemental health sessions without my written consent.
- I understand that the provider will not allow any other individual to listen to, view or record my telemental health session without my written permission.

My Responsibilities

- I will not record any telemental health sessions without written consent from the provider. I will inform the provider if any other person can hear or see any part of our session before the session begins. The provider will not allow any other person to hear or see any part of our session.
- I understand that I, not the provider, am responsible for providing and configuring any electronic equipment used on my computer that is used for telemental health. I understand that it is my responsibility to ensure the proper functioning of all electronic equipment before my session begins.
- I have read and understand that all practice policies of Polaris Counseling apply to all telemental health as well as all in-person visits, including the Contract For Services Agreement and the Notice of Privacy Practices.
- I understand that I agree to be seen face to face at least once a year to maintain therapeutic services.
- I understand that I must establish a face-to-face therapeutic relationship with my proposed telemental health provider prior to commencing telemental health treatment.
- I understand that I must provide emergency contact information for persons in my location and give consent for them to be contacted in case of medical or mental health emergencies prior to commencing telemental health treatment.

Emergency Contact Information

Provide the contact information for two persons that your provider could contact in the case of medical or mental health emergencies.

1) Name: First: _____ MI: ____ Last: _____

Date of Birth: _____

Address: _____, City: _____, State:

ZIP: _____

Country: _____

Email address: _____

Patient telephone contact: _____

Alternate method to contact: _____

2) Name: First: _____ MI: ____ Last: _____

Date of Birth: _____

Address: _____, City: _____, State:

ZIP: _____

Country: _____

Email address: _____

Patient telephone contact: _____

Alternate method to contact: _____

Patient Consent for the Use of Telemental Health

I have read and understand the information provided above regarding telemental health. I have discussed this information with my provider and all my questions have been answered to my satisfaction. I acknowledge that my participation in the telemental health process is voluntary and may possibly increase the risk of disclosure of my PHI data. I hereby give my informed consent for the use of telemental health in my mental health care in the course of my diagnosis and treatment.

Patient Name: First: _____ MI: _____ Last: _____

Date of Birth: _____

Address: _____, City: _____, State: _____

ZIP: _____

Country: _____

Email address: _____

Patient telephone contact: _____

Alternate contact: _____

Signature: _____ Date: ____/____/____

Patient Signature or authorized person if patient is under 18 years old), relationship _____

Parent/Guardian Name: First: _____ MI: _____ Last: _____

Signature: _____ Date: ____/____/____

Patient Consent for the Use of Non-Secure Telemental Health Sessions during the Illinois Gubernatorial Disaster Proclamation

I have been advised by my counselor that as a result of the Illinois Gubernatorial Disaster Proclamation that was signed March 19th 2020 in response to the COVID-19 outbreak, the state of Illinois are allowing audio/video and telephonic communications that, prior to the Gubernatorial Disaster Proclamation, were considered non-secure forms of communication. For as long as the Gubernatorial Disaster Proclamation is in effect, Facetime, Facebook Messenger, Google Hangouts, Zoom, Skype and other popular audio/video phone apps have been determined to be acceptable forms of communication for telemental health services. These third-party applications are not designed specifically to protect your personal healthcare information (PHI). As a result, this could introduce privacy risks.

I have read and understand the information provided above regarding telemental health. I have discussed this information with my provider and all my questions have been answered to my satisfaction. **I acknowledge that my participation in the telemental health process with a non-secure audio/video platform is voluntary and may possibly further increase the risk of an unauthorized disclosure of my PHI data.** I hereby give my informed consent for the use of telemental health services via a non-secure platform for my mental health care in the course of my diagnosis and treatment.

Patient Name: First: _____ MI: _____ Last: _____
